

BC Soccer (governing body), in the interests of players' health and safety, requires ALL players and parents and/or guardians (if player is under 18 years old), to be educated about the signs and symptoms of concussions. All parents and adult players are required to complete the online Concussion Awareness Training course to ensure you are aware of the signs and symptoms of a concussion, as well as the return to play protocols at www.cattonline.com . In addition, there are additional resources available parents and players for review in our [Club Guide](#) under the Safety section. Parents and players have a responsibility to report all concussion-related injuries and illnesses to an independent medical professional. CMFSC reserves the right to limit players' return to the field, based on the aforementioned protocols and professional medical advice.
